

# OIL & GAS

## STATEMENT OF QUALIFICATIONS

RRC provides multi-disciplinary services to the upstream, midstream, and downstream sectors of the Oil & Gas industry. We deliver exceptional value to some of the leading companies in the industry and understand how our capabilities relate to our clients' projects. Our timely and quality deliverables help our clients keep their projects on time and on budget. RRC's qualified staff and certified facilities set us apart from our competitors.

RRC has been directly involved in an extensive number of Oil & Gas projects. Typical projects include tank batteries, pump stations, compressor stations, and refineries. Consultation and assistance is provided through every step of development, management, and engineering of your project.

## PROJECT MANAGEMENT SERVICES

At RRC, we value innovation and offer a unique, concurrent engineering package that allows for various engineering disciplines to occur simultaneously. The package saves valuable overall project time and enhances interaction between engineering disciplines. Our streamlined **Multi-Discipline Project Management** package offers one point of contact managing various disciplines needed in your project. Our concurrent engineering packages can often save weeks on the project schedule. Contact us today for an assessment of your project needs.
