

# PROJECT MANAGEMENT SERVICES

ONE PACKAGE

ONE TIMELINE

ONE POINT OF CONTACT

ONE CHOICE

## PATH TO SUCCESS

The **path to success** involves employing a comprehensive multi-disciplinary approach with a single contact for coordination and design responsibility.

## PROJECT TIMELINE

At RRC, we value innovation and offer a unique, concurrent engineering package that allows for various engineering disciplines to occur simultaneously. The package saves valuable overall project time and enhances interaction between engineering disciplines. Our streamlined **Multi-Discipline Project Management** package offers one point of contact managing various disciplines needed in your project. Our concurrent engineering packages can often save weeks on the project schedule.

## PACKAGE BENEFITS

- Single point of contact
- Reduce overall project costs
- Minimize project risks
- Save significant time on project schedule
- Streamlined communications and collaboration

## SERVICES

- Civil Engineering
- Construction Materials Testing (CMT)
- Electrical Engineering
- Geotechnical Engineering
- Structural Engineering
- Land Surveying

# THE RRC DIFFERENCE

The **difference** starts with the way our team approaches your project timeline. Instead of a linear approach separated by the need to coordinate between different companies handling various disciplines, RRC can stack different service activities and communicate results internally to save our clients time and coordination efforts. The central contact simplifies communication between the disciplines and reduces project uncertainties and risks.

# CONTACT US

Contact our experts today for an assessment of your project needs.
