

LAND SURVEYING

STATEMENT OF QUALIFICATIONS

RRC provides a wide range of land surveying services, from commercial and industrial development and construction projects to oil and gas related surveys. We are currently authorized and registered to perform survey work in a number of states and continue to expand our offerings. All surveys are conducted under the direct supervision of our professional surveyors who have immense experience in the land surveying industry. Surveys are conducted using a combination of GPS and conventional systems.

Professional Land Surveying is regulated by:

- Texas Board of Professional Land Surveyors
- New Mexico State Board of Licensure for Professional Engineers and Professional Surveyors
