

COMMERCIAL & URBAN LAND

STATEMENT OF QUALIFICATIONS

RRC provides a wide range of land surveying services from commercial and industrial development to construction staking. Between our licensed professionals and staff, RRC has over 100 years of combined land surveying experience with the expertise and experience to address all of our client needs.

We are currently authorized and registered to perform survey work in a number of states and continue to expand our offerings. All surveys are conducted under the direct supervision of our professional surveyors. Surveys are conducted using a combination of GPS, drone, and conventional systems.
