

ON-SITE SUPPORT

STATEMENT OF QUALIFICATIONS

At **RRC**, **On-site Support** plays a pivotal role, guiding clients in the renewable sector from the initial contract development phase through operations and maintenance.

Our comprehensive suite of services includes vendor quality management support, on-site construction assistance, and contract support, ensuring a seamless project lifecycle. Beyond project completion, our commitment extends to asset management and operations, where we provide targeted training to guarantee the long-term success of our clients.

Licenses

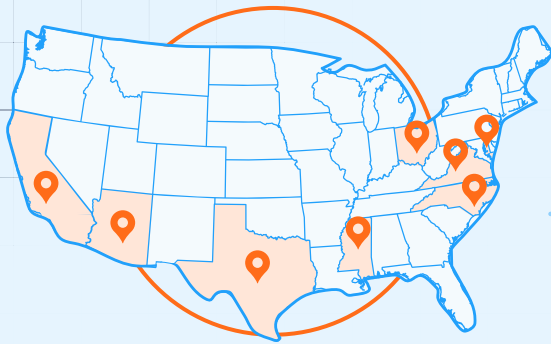

All our auditors have **OSHA 10** or **OSHA 30** certification.

→ Why RRC

At RRC, we stand out in the field services industry through our comprehensive approach and extensive industry knowledge. We seamlessly support our clients from vendor engagement through operations and maintenance, enabling us to identify and address supply chain issues efficiently.

Our unique strength lies in proactive problem-solving; our inspectors are not only trained on prevalent industry concerns but are equipped to anticipate potential issues. What sets us apart is our commitment to offering more than on-site assistance as our clients receive the backing of an entire team. With support extending from our main office, our field crew can access valuable information and guidance whenever they encounter challenges, ensuring a seamless and proactive service experience.
